# Introductory

---

The present volume constitutes the 1944 edition of Henderson's Directory of Lethbridge. The work embodies a complete epitome of the civic, commercial, social and industrial interests and activities of the municipality. It is a modern Directory in all its parts and includes all the essential features which have proven so satisfactory to our patrons in previous issues; these have been retained and amplified, and improvements have been added as suggested by experience in order to add to the value and usefulness of the Directory thus fully meeting the requirements of patrons; the approbation and continued patronage accorded the work are constant incentives to better service.

The publication has had the benefit and advantage of the complete organization and resources of the publishers, and of the skill and experience of their corps of enumerators and compilers added to the courteous co-operation of citizens, in the production of the volume.

Under Wartime Prices and Trade Board Regulations we have been instructed to reduce the quantity and weight of paper used in our publications by 25 per cent.

To effect this economy, and to give our Patrons the same reliable information as in previous issues, we have used smaller type and lighter weight paper than in previous issues.

Although this Directory does not contain the same number of Pages as the last issue, the information contained therein has in no way been impaired by these changes.

## THE STREET AND AVENUE GUIDE

THE STREET AND AVENUE GUIDE starting on page 31 features the names of all streets and avenues arranged alphabetically and numerically, giving the location, number on the street and showing the occupant.

The intersecting streets are shown in the order that they come.

\* Denotes that there is a Telephone in the house.

## THE ALPHABETICAL DIRECTORY

THE ALPHABETICAL LIST OF NAMES of citizens, business firms and corporations starts on page 73.

## THE CLASSIFIED BUSINESS DIRECTORY

THE CLASSIFIED DIRECTORY at the end of Book, exhibits the various manufacturing, mercantile, and professional names, compiled under headings appropriate to the class of industry or profession followed.

## ADVERTISING LETHBRIDGE

An important function of the Directory is to set forth the characteristics and advantages of the city as a place of residence, as a business location, as an industrial site, and as an educational centre. The Directory acts as a mirror, reflecting all that is noteworthy in the city in the above respects. In order to spread this information regarding the city broadcast over the country, the publishers have placed copies of this issue of the Directory in the directory libraries, where they are readily available for reference use by the public. There they serve as perpetual advertisements of Lethbridge, for business men the country over realize that the City Directory represents the community as it really is.

The publishers take this opportunity of thanking the citizens for valuable assistance rendered in the way of furnishing information concerning themselves, their friends and their business interests for this Directory, and also the public-spirited and progressive business and professional men for support given in the way of patronage.

Respectfully, The Publishers

HENDERSON DIRECTORIES LIMITED.

November, 1944.

# Lethbridge, Alberta

## AGRICULTURE

South Alberta experienced subnormal moisture conditions in 1943 when precipitation for the twelve months fell to 12.29 inches at Lethbridge as compared with 15.77 inches for the 40-year average and 20.63 inches in 1942.

Fortunately the crop season opened with the subsoil full of moisture from 1942, and it can be said that the crop of 1943 was grown on the precipitation of 1942.

As a result the wheat yield of the Lethbridge railway division amounted to to only some 21,600,000 bushels as against a record-breaking crop of more than 55,000,000 bushels in 1942. The average wheat yield was 12 bushels. Barley crops averaged 20 bushels, oats 25, and flax only some seven bushels per acre. Hay crops were generally a little better in proportion than grain crops. Pastures during the year were fairly good except in the extreme southeastern short grass country where not enough moisture fell during the season to start the grass on some ranges in the spring or summer of 1943.

Fortunately for the livestock population, South Alberta had a very heavy carryover of both feed and coarse grains from the phenomenal 1942 crop, and there were good supplies to see the livestock through to the 1944 harvest. Fortunately, too, for the wheat growers there was a heavy carryover of wheat, some 59,000,000 bushels being in the elevators or farmers' hands on the Lethbridge railway division at the end of 1943, much of it being a carryover from 1942. This wheat was worth conservatively \$70,000,000, and formed a backlog for the payment of debts and to carry on till the 1944 harvest.

The outlook for 1944 was not bright so far as moisture was concerned as there was practically no carryover of moisture in the subsoil. Good rains will be needed during the growing season of 1944 to assure a normal crop.

Indications are that there will be some changes in the agricultural picture in South Alberta during 1944. There will be some swing back to grains, and some reduction in livestock production. One of the chief reasons, of course, will be the growing shortage of coarse grain carryover. The bottoms of the feed bins are being scraped. But another important reason is the growing shortage of farm labor. With so many sons of the farm now in active service, the older men with the aid of the women and children have been carrying on, doing a herculean production job on the food front. But with the war now nearing the end of the fifth year the physical ability of the farm population to maintain high speed production is being overtaxed. Grain requires less labor than livestock, hence the swing back to grain farming on a commercial basis. The higher prices for grain now in effect—\$1.25 per bushel for wheat, 61 cents for oats, 79 cents for barley and \$2.75 for flax, basis Fort William—will be an incentive to increased commercial grain production. Another important factor in this trend is the greatly increased demand for grain commodities. United States is now seeking 175,000,000 bushels of wheat from Canada. The burdensome carryover of wheat which reached a billion bushels in the fall of 1942, is disappearing, and the grain grower now has confidence that what he can grow will find a ready market.

One important outcome of increased production and better prices during 1943 has been a debt retirement program on the part of farmers that has been the subject of much favorable comment. Land payments, mortgage payments, machinery bills and tax bills have all been reduced in great proportion than at any time since the twenties. Besides, farmers have been buying Victory Bonds, building up a backlog of savings for the post-war years when heavy replacements of machinery and buildings will be necessary. All the indications are that farmers will come out of this war in a much better financial position to meet the changes from a war economy to a peace economy than was the case in the Great War. They are working steadily to that end, with little thought of gambling in land values, and with very little of the talk about debts which characterized the early years of the war. Agriculture has a more solid footing under it today than ever in the history of Southern Alberta.

## BET SUGAR INDUSTRY

The year 1943 saw completion by the present beet sugar industry of nineteen years continuous operation in Southern Alberta. During this time, in which the industry grew to maturity, most of the vicissitudes of nature and caprices of fortune were experienced.

As in 1942, the Dominion Sugar Administrator again asked for increased sugar production in 1943. Complying with this governmental request the industry contracted and growers planted and harvested over 29,000 acres, the largest acreage in Alberta history.

In direct contrast to the copious moisture condition prevailing in 1942, 1943 proved to be the driest year in the beet growing area since 1918. Precipitation figures ranged from 11.34 inches at Lethbridge to 7.56 inches registered at Picture Butte. This drought condition was reflected in the lowest yields since 1935 and considerable loss in storage piles at the factories and country storage points.

Weather conditions however, were ideal from the contract labor's standpoint so that the increased acreage was efficiently handled by the labor, in the district, augmented by Prisoner of War labor caring for approximately 700 acres. While the hauling equipment shortage was not so acute as in 1942 the general farm labor situation was no easier.

Three labor saving devices made their initial appearance during the year: the planting of segmented seed; use of the Dixie Cotton Chopper, a mechanical thinner; and the extended purchase and use of 19 mechanical beet loaders. 1944 promises to see substantial increased use made of all three innovations.

Comparative figures of production from 1925-1944, five year intervals, follow:

Year	No. Growers	Acres Harvested	Beets Bought	Cwt. Sugar Produced
1925 .....	582	5,394	41,465	75,445
1930 .....	746	13,610	127,108	261,875
1935 .....	820	13,929	138,809	444,509
1940 .....	1,170	23,840	336,281	934,664
1943 .....	1,342	29,306	298,934	832,632

The two factories processed a total of 264,425 tons, Picture Butte slicing 140,874 tons, Raymond slicing 123,551 tons. Both plants operated a 93-day campaign.

All 1942 sugar has been marketed and the 1943 crop is now moving into trade channels as required for use. The 1942 general marketing arrangements, with the Sugar Controller, extend to the 1943 crop of sugar, so that it will be largely marketed in the prairie provinces.

Last year there were 1342 growers, 4000 farm laborers and truckers, 350 Prisoners of War, and 700 company employees engaged in production of this every day necessity.

1943 and 1944 beet payments of over \$4,000,000 will energize the economic life of the community through various channels; \$3,120,000 to growers of which over \$900,000 goes to contract labor; \$850,000 for freight; \$550,000 for materials and nearly \$550,000 for wages.

Livestock finishing and dairy operations, oftentimes little appreciated as integral parts of successful beet growing, have increased enormously over 1942. Demands for beet by-products are in proportion. Statistics in the factory areas indicate growth over 1942 as follows: Beef 69 percent; dairy 103 percent; lambs 79 percent; ewes 52 percent. Involving over 148,000 head of livestock.

Thus, in times of stress as well as in normal years, the sugar industry marches shoulder to shoulder with other agricultural and manufacturing enterprises of the community, to provide the sinews of district and national economic welfare, in the Lethbridge constituency.

#### MILLING

##### Ellison Milling & Elevator Company Limited

The flour mill at Lethbridge, owned and operated by the Ellison Milling & Elevator Company Ltd, produced more flour in 1943 than in any other year in the long history of its operation. Production was maintained on a 24-hour schedule, six days per week all through the year with the exception of occasional shut-downs for minor repairs to equipment. Over a million bushels of wheat was processed into flour and the total produced exceeded the 1942 output by 26%. This capacity production was in line with Canada's great effort to produce record quantities of essential foodstuffs as well as munitions of war.

While the grain crop in 1943 was relatively light compared with the bumper crops of 1941 and 1942, there was sufficient wheat of excellent milling quality to fill all requirements and leave commercial and government storage practically full

and considerable in farmers' hands to be delivered as quotas opened during the spring and summer months of 1944. The wheat grown in 1943 was higher in protein content than the 1942 crop.

Several different varieties and types of wheat were utilized by the Ellison Co in the manufacture of different types of flour and cereals, all varieties being grown in Southern Alberta. High protein hard spring wheat was used to make Vitamin B White Flour (Canada Approved), regular type bread or all-purpose flour, self-rising flour, wheat cereals and semolina. Some of the last mentioned product was supplied to a new Canadian industry for the purpose of making glucose which is a sugar substitute used by commercial bakeries and candy manufacturers. Irrigated spring wheat was converted into biscuit flour along with Alberta Red Winter wheat. Special cake flour and pastry flour was made from soft white spring wheat grown under irrigation and this type of flour was in great demand because of the shortage of Ontario winter wheat and the prohibition against the importation of any soft flour from the U. S. and Australia.

For the first time since the war started in the fall of 1939, some export flour was shipped through west coast ports. This flour was destined for Russia and was purchased by the British Government and supplied under Mutual Aid agreements.

While most of the domestic brands of flour milled at the Ellison plant was sold in the four western provinces, a few cars were shipped into Ontario and Quebec, which market is relatively new for the local company. Demand for flour and cereals in Canada continued good throughout the year but the main reason for record production was the large scale buying of the British Ministry of Food for shipment to England, Scotland, Russia and other Allied war fronts.

In keeping with the increased flour business during 1943, the production and sale of mill feeds and mixed or prepared feeds for the feeding of livestock and poultry also was up in total tonnage. Many carloads of feed were shipped to British Columbia, Ontario and Quebec as well as other points as far away as New Brunswick to help produce the huge quantities of meats, eggs and dairy products now needed in the war effort.

The Ellison Company continued to give excellent chopping and crushing service to many local farmers and feeders in the feeding centers of Lethbridge, Raymond, Magrath and Picture Butte. Also custom grain cleaning was done at some of the Ellison elevators and at Lethbridge. The quantity of flax cleaned for seeding in the spring of 1943 was unusually large.

The experiment on the growing of soy beans was continued but without any notable success.

With increased activity in all departments the Company experienced some periods when labor was short but whenever this occurred older employees in length of service helped to carry the extra load until sufficient help became available. Steady employment was given to a large staff throughout the year.

The management is again mindful of the many advantages in conducting business in Southern Alberta and is looking forward to another good year in 1944.

#### **ALFALFA MEAL**

Each year feeders of poultry and hogs are realizing more and more the importance of "balancing their rations" to include vitamins, protein, minerals, etc. Accordingly, Alfalfa Meal produced in the Lethbridge area, being an excellent source of important vitamins A and D, as well as the vitamins B and C, continues to enjoy a very high and favored position on Western Canadian markets as well as attracting attention of eastern buyers.

With the increased demand for Green Star brand Alfalfa Meal and the increased grinding facilities of Geo. W. Green & Co., there is room and proper incentive for increased acreage to be devoted to this valuable crop—alfalfa.

Modern irrigation long days of sunshine during the growing season, up-to-date methods of processing the raw material, and confidence of the feed manufacturing trade in the Green Star brand, continues to hold Lethbridge in first place as the source of Alfalfa Meal of superior, uniform color, texture and general quality in all of Western Canada.

While various employees of Geo. W. Green & Co. Ltd, have been attracted by the "call to arms" of each branch of the service, army, navy and air force, and though replacement of worn equipment is limited, the remaining personnel double up on work when necessary, with the determination that this essential industry "shall not flag or falter" so that production continues favorably and Alfalfa Meal is turned out, delivered to feed manufacturers all in the process of providing more bacon and eggs for Britain and for the home front.
